PROFILE

As a final-year student pursuing a Bachelor of Technology (B.Tech) degree in Computer Science & Engineering at Godavari Institute of Engineering College, Rajahmundry, I am passionate about front-end development. Familiar with HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS, with knowledge of React.js, I am eager to leverage my academic training and hands-on experience to contribute effectively as a Front-End Developer.

PROJECTS

Image Search Web Application

github link   Live

- Developed a mobile-friendly web application utilizing the Pixel API for image retrieval.
- Implemented a user-friendly interface with keyword-based image search and one-click download functionality.
- Enhanced user experience with a "Load More" button for seamless exploration of images.

Shoppy

github link   Live

- Developed a visually appealing e-commerce frontend with seamless navigation and layout adaptation across devices.
- Integrated captivating hero sections and user-friendly product listings to enhance product visibility and user experience
- Implemented smooth animations and provided customization options like light/dark mode themes to improve user interaction and accessibility.

YouTube Clone

github link   Live

- Created a YouTube clone with advanced search, channel pages, and smooth video playback.
- Implemented user-friendly features like comments sections and suggested videos.
- Offered customization with light/dark themes for enhanced user experience.
- Integrated external API for seamless functionality.
